### Key benefits

- ◆ **ezCallTrack** will tell you exactly when a call was actually answered by the called party and calculate the charges<sup>1</sup>
- ◆ Calls won't be lost even when the computer where **ezCallTrack** is installed is turned off<sup>1</sup> while customers are talking. When you start **ezCallTrack** you will see all calls made for that day
- ◆ Ability to handle several combinations of VoIP gateways and Serial PBX's connections at the same time: You may have some lines with a VoIP gateway and others with a Serial PBX and **ezCallTrack** will monitor your calls
- ◆ Easy configuration for booth/extension name assignments. **ezCallTrack** allows you to configure the presentation layout for the booths and/or extensions
- ◆ Handle Internal Office Extensions. **ezCallTrack** will also help you by tracking all calls made by any internal/office extension connected to your VoIP gateway or PBX
- ◆ Global Rate Updating. Update calls rates, per country in a matter of seconds with an easy and intuitive form. Also import/export rates from other **ezCallTrack** installations
- ◆ No more hidden calls. **ezCallTrack** allows you to see paid and void calls, discounts applied and get accurate information about your daily call's

### Custom Development Available!

<sup>1</sup> Feature only available when connected to a VoIP gateway like the Quintum-Tenor®

**ezCallTrack** is not a PBX replacement software.
